

AMENDMENTS TO THE CLAIMS

Please amend the claims as follows:

Claims 1-31. (Cancelled).

32. (Currently amended) A cellular telephone having a substantially cuboidal form with a front surface bearing a key pad, an opposed rear surface, and at least two opposed side surfaces and two opposed end surfaces extending between the front and rear surfaces, the cellular telephone having a visual indicator comprising an electro-optic medium having at least two different display states, the electro-optic medium being arranged to change its display state when a call is received by the telephone, ~~the external surface of the cellular telephone comprising at least three separate surfaces and the visual indicator being present on at least two of said separate surfaces~~the visual indicator being present on the rear surface and the two opposed side surfaces.

33. (Original) A cellular telephone according to claim 32 wherein the electro-optic medium is arranged to change repeatedly between said at least two different display states when a call is received by the telephone.

34. (Original) A cellular telephone according to claim 33 wherein the electro-optic medium has at least two modes of changing repeatedly between said at least two different display states when a call is received by the telephone.

35. (Cancelled).

36. (Cancelled).

37. (Previously presented) A cellular telephone according to claim 32 wherein the visual indicator covers at least about 5 per cent of the external surface of the cellular telephone.

38. (Cancelled).

39. (Cancelled).

40. (Cancelled).

41. (Original) A cellular telephone according to claim 32 further comprising an audible indicator means for indicating when a call is received by the telephone, and selector means whereby a user may select operation of either the visual indicator means or the audible indicator means when a call is received by the telephone.

42. (Original) A cellular telephone according to claim 32 wherein the electro-optic medium comprises an electrophoretic medium.

43. (Original) A cellular telephone according to claim 42 wherein the electrophoretic medium is an encapsulated electrophoretic medium.

44. (Original) A cellular telephone according to claim 32 wherein the electro-optic medium comprises a rotating bichromal member medium.

45. (Original) A cellular telephone according to claim 32 wherein the electro-optic medium comprises an electrochromic medium.

46. (Original) A cellular telephone according to claim 45 wherein the electrochromic medium is a nanochromic film comprising an electrode formed at least in part from a semi-conducting metal oxide and a plurality of dye molecules capable of reversible color change attached to the electrode.

Claims 47-51. (Cancelled).

52. (New) A cellular telephone according to claim 32 wherein the visual indicator is also present on an end surface of the telephone.

53. (New) A cellular telephone according to claim 32 wherein the visual indicator is also present on a portion of the front surface of the telephone.
